

POC PROCESS

Pre Installation

- Identification of Host Site
- Information Exchange
- Energy Consumption & Estimated Savings Calculations
- Most Appropriate People Counting Sensor Technology Selected
- Sensor Location Map Confirmed

Installation

- Cabling
- IP Addresses Provided
- Sensor & NUC Configuration
- Sensor Installation
- Calibration

Post Installation

- Site Goes Live
- Sequence of Operations Scripted
- Trend Data/Meter Data Monitored
- M&V - Final Calculations
- Project Report Finalized & Presented
- Customized Space Utilization Reports and Dashboard Inputs Approved by Customer

Results

- Reduce Energy Consumption & GHG Emissions
- Lower Operating Costs
- Highly Accurate Space Utilization Data
- Reduce Wear & Tear on HVAC Equipment
- Data Driven IAQ Strategy
- Rich Data Set for Grid Management
